

Elders Who Can't Make Ends Meet in El Dorado County As Measured by the California Elder Economic Security Standard™ Index

The California Elder Economic Security Standard™ Index (Elder Index) measures how much income is needed for a retired adult age 65 and older to adequately meet his or her basic needs including housing, food, out-of-pocket medical expenses, transportation, and other necessary spending. For an elderly renter living alone in El Dorado County, the Elder Index is approximately \$23,000/year.

Not Just "Poor" Elders Who Are Struggling in El Dorado County

- **33% of all elders age 65+** do not have enough income to meet their most basic needs, as measured by the Elder Index. **That's 7,000 elders struggling to make ends meet.**
- In contrast, according to the Federal Poverty Line (FPL), only 7% (1,000) El Dorado County elders are considered "poor," with annual individual incomes below \$10, 210.
- But a large number of other elders (5,000 or 26%) fall into the **"eligibility gap,"** with incomes above the FPL but below the Elder Index. These elders don't have enough money to cover their most basic needs, but have too much to qualify for many public programs.
