

Elders Who Can't Make Ends Meet in Santa Barbara County As Measured by the California Elder Economic Security Standard™ Index

The California Elder Economic Security Standard™ Index (Elder Index) measures how much income is needed for a retired adult age 65 and older to adequately meet his or her basic needs including housing, food, out-of-pocket medical expenses, transportation, and other necessary spending. For an elderly renter living alone in Santa Barbara County, the Elder Index is approximately \$28,000/year.

Not Just "Poor" Elders who are Struggling in Santa Barbara County

- 39% of *all* elders age 65+ do not have enough income to meet their most basic needs, as measured by the Elder Index. **That's more than 19,000 elders struggling to make ends meet in Santa Barbara County.**
- In contrast, according to the Federal Poverty Line (FPL), only 5% (2,000) of Santa Barbara County elders are considered "poor," with annual individual incomes below \$10,210.
- But a large number of other elders (16,000 or 34%) fall into the "eligibility gap," with incomes above the FPL but below the Elder Index. These elders don't have enough money to cover their most basic needs, but have too much to qualify for many public programs.

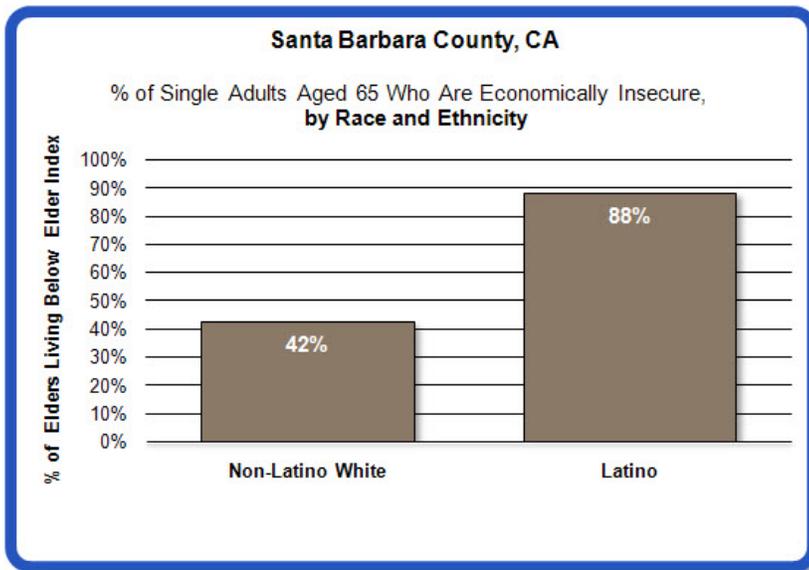

Women Living Alone More Economically Vulnerable

- Historically, women have earned less than men. Today they still earn, nationally, an average of 78 cents for every dollar a man earns. It's no wonder that women living alone are particularly vulnerable.
- Without a partner to share the expenses, and in the face of increasing costs and fixed incomes, **over half of the elder women living alone in Santa Barbara County are struggling to make ends meet.**

Elders Who Can't Make Ends Meet in Santa Barbara County As Measured by the California Elder Economic Security Standard™ Index

Latino Elders Struggle the Most

- **Nearly 9 out of 10** Latino elders in Santa Barbara County have incomes below the Elder Index.
- Although non-Latino White elders are doing better, over 4 in 10 are still economically insecure.
- The number of African American and Asian elders who live alone on incomes below the Elder Index is less than 1,000, and therefore too small to calculate reliable estimates.

Renters Living Alone Are the Most Economically Vulnerable

- **In high cost Santa Barbara County, almost 6 out of ten elder renters living alone** are trying to survive on incomes below the Elder Index.
- Even elders who own their home outright and live alone are struggling: almost 4 out of ten are unable to meet their basic needs:

Number of elders who live alone and own their own with a mortgage is less than 1,000 and therefore too small to provide a reliable estimate.
